PMG Manufacturing Services can connect you to various manufacturing companies across the country that need temporary skilled tradesmen for their project. Their tradesmen have the option to work for various companies. There are a variety of trade jobs that they hire for, but their most common positions are for machinists, welders, and maintenance technicians. You will be a W-4 employee with PMG, and not an independent contractor (1099). This is a great option for those who want to continue living in their local community.

They also have career development resources that are helpful for any job seeker such as webinars, a blog, and YouTube channel:
