

AZ Strategic Vision Reports

At the state level, NPC participates in the [Arizona Community Colleges Strategic Vision](#) for 2030, an ongoing effort for Arizona's ten community colleges to improve and align post-secondary education and training in the State. NPC reports student progress and outcomes data on a minimum of 30 key indicators of progress toward three areas (access, retention, and completion). Every year NPC receives its own outcome report and a state level outcomes report. Click [here](#) for the Strategic Vision Technical guide that describes the metrics and data specifications associated with each indicator.
